Engineers Wanted:
Is there a market failure?

The S&E Problem:

- Not enough—for what?
  - The jobs available?
  - For supply-induced innovation?
  - For diffusion of engineering skills?
  - “The Future”? Here and There (US and China)

Why?

- Lack of student interest?
- Lack of student ability?

The Solution:

- A “New Sputnik Moment” …..or Markets?

Solving the S&E “Shortage”: Are Markets “the Problem”?

Is government market intervention the response to the price of a free-market solution?
A College Degree, but Not a College Job

A growing share of recent college graduates are having to settle for jobs that do not require a college degree, and they are earning far less than their peers as a result.
